

SC-252 Aviation Newspapers

(2 items)

Donated by Brian Rihm, this collection contains two historical newspapers documenting accomplishments in aviation history. Both newspapers are quite fragile and require in handling.

1. *The New York Times*, Thursday, May 14, 1908. Front page article “Wright Aeroplane Goes Three Miles.”
2. *The New York Herald Tribune*, Friday, April 30, 1926. Photo and caption on page 12, “New Aircraft Motor Succeeds.” Caption reads: “The Fairchild-Caminez 150 horsepower air-cooled engine, which has no crankshaft and weighs 350 pounds, was tested successfully in a flight at Farmingdale, L.I., yesterday afternoon. In the picture are Harold Caminez (left), formerly in charge of the engine design section of the United States Army Service at McCook Field, Dayton; Richard H. Depew jr., test pilot (center), and Sherman Fairchild, builder. Insert shows figure 8 shaped cam, which is rotated by round bearings hung in center of pistons, instead of a crankshaft.”
